MINISTRY AREA TRAINING DESCRIPTIONS

INTRODUCTION TO DISASTER RELIEF

General overview of the work and ministry of SBDR. It is required for all volunteers every 3 years, including those recertifying. This keeps everyone up to date with any changes and updates the background check.

MASS FEEDING – **Our most popular and often most needed call out following a disaster.*

You will learn about feeding operations to ensure the safe storage, handling, preparation, and distribution of food to disaster survivors and volunteers.

CHAINSAW SAFETY & CHAINSAW: LIMBING – **A future course will be offered for **Chainsaw: Felling**.*

- **Chainsaw Safety / Brush Pulling** provides a brief overview of the safe chainsaw operation serving on a chainsaw team and brush pulling. Safety is a priority.
- **Chainsaw: Limbing** is for those who desire to use a chainsaw on a KYDR team and covers limbing of trees already on the ground. Chainsaw Safety is a prerequisite to Chainsaw: Limbing and will be hands-on – dress appropriately.

CHAINSAW FIELD MAINTENANCE

Basic chainsaw field maintenance including inspection, cleaning, chain tension, sharpening, and other minor adjustments.

ROOF TARPING

Safety procedures and processes to protect volunteers and property. Roof work isn't required; there are roof and ground crews.

FLOOD RECOVERY

This course teaches safety and work procedures in home clean-up after a flood including debris removal, tear out, and sanitization.

SHOWER / LAUNDRY

Proper methods of sanitizing, cleaning, and basic maintenance of the units. Services will be provided to our volunteers and/or public.

DAMAGE ASSESSMENT **Previous recovery (chainsaw/flood) experience required.*

Damage assessors visit homes affected by disasters and often make first contact with the homeowner(s). They gather information, assess damage, minister to families, complete the property owners request for assistance assessment form, and report their findings.

CHAPLAINCY **Two-day training: must hold a current KYDR DR badge, a member of a SBC church, and DR experience preferred.*

Chaplains provide spiritual care to those affected by a disaster which includes, but not limited to, survivors, family members, and our own volunteers. Pastors & AMS's can attend without prior experience but must have a current KYDR badge.

BASIC DISASTER COMMUNICATIONS

Basic skills and how to set up and use communication tools on deployments including handheld radios, IT, Starlink, and cell boosters.

WATER PURIFICATION

Learn about the need for filtered water, ways to purify water, different types of water filters for use when responding to disasters whether domestic or international.

PRACTICAL SKILLS

EVANGELISM IN CRISIS **Note: this is not chaplaincy training.*

This course will offer tools to learn how to minister to people you meet on responses with your presence, prayer, and conversation. Learn how to engage those around you in Gospel conversations.

FIRST AID / CPR

Either course provides certification.

ASSOCIATIONAL MISSIONS STRATEGIST **AMS's only*

To inform AMS's of their role during disasters in their local association and how they assist in the response.
